Projects

- **Translation Speech Application** – Front End Application – UI/UX application created with HTML, CSS, and JavaScript, powered off many interacting web APIs processed by jQuery to interpret and translate voice and transcribe in desired translated language. Ability to have full conversation with non-native speakers and have application service means of communication.
- **Movie Reserve Application** – Front-End Application – UI/UX application created with HTML, CSS, and JavaScript, using local storage and web APIs powered by jQuery to select a desired movie to watch. UI/UX friendly due to dynamic interaction capability.
- **Employee Tracker System** – Back-End Application – CLI that utilizes express, inquirer, and console table to allow a manager of a firm to utilize CRUD on other employees of firm for maximum effectiveness.
- **Travel Planner Application** – Full-Stack Application – Web application that utilizes Handlebars, Sequelize, Node JS, Passport, Express, OAuth verification, among many other great features, such as SASS and SCSS, jQuery, Bootstrap, and Font Awesome. Allows user to plan future trips by picking destination, able to scout such destinations through API usage, and store users data for future instances.

Skills

Full-Stack Web Development – MERN – MySQL – JavaScript – Python – Excel & VBA
